

# ANCHOR CATCHER

7" Anchor Catcher

## DESCRIPTION

The Wyoming Completion Technologies "DBA" Anchor Catcher is a heavy duty, reliable, retrievable double grip anchor that anchors the tubing in tension or compression. With proper tension pulled, the anchor prevents movement of the tubing string during pumping strokes, thus reducing rod and tubing wear. The anchor also holds the tubing stationary should it part.

## FEATURES/BENEFITS

- Rotate left to set, right to release.
- Straight pull emergency shear release.
- Increases pump efficiency.
- Improves operating costs by reducing maintenance and down time caused by tubing or sucker rod wear.
- Optional right hand set.
- Fully retrievable.
